Courses in research training are organised through the Social Sciences Research Methods Programme (SSRMP) and may be valuable to students. The full list of modules and the timetable can be found at <https://www.ssrmc.group.cam.ac.uk/bookings/making-a-booking>. The course includes modules on advanced statistics, research design and methods training which may help lay the foundation for research training for MPhil students who intend to go on to a PhD. Courses can be attended by PhD students, provided space is available.

Students should note that attendance on all SSRMP courses should be booked via the link above.
